

Highlighting the Effects of Improved Calcium Mobility

Ca **THE DATA:** Improved calcium mobility sounds good, but how does Fortalis® perform? Take a look at our replicated trial results below.

Fortalis®* + fungicide delivered average yield uplift of 4.5 bu/a over untreated in replicated trials in 2015, 2016, and 2017

Positive yield in 84% of all trials and an 8.1% increase in yield overall

SO WHAT DOES IT MEAN?

All trials in the green shaded area above experienced greater than 2 bu/acre increases. **That's 74% of the trials.**

Fortalis® + fungicide consistently delivers a **4.5 bu/acre increase** on average.

This equates to a 2.9:1 ROI. So if \$1 is spent on Fortalis® + fungicide, then \$2.90 can be expected back after rebates.

Did you know?

- Each of these trials has 6 or more replications.
- 176 different trials are represented here. We take testing our products seriously.
- Using Fortalis® alone gives you a positive ROI, estimated at 3.0:1. It can also be tank-mixed with insecticides and other nutritional products.

THE TAKEAWAY: As a proven, profitable, and versatile tank mix partner, Fortalis® is an essential crop input and a responsible choice this season. If a fungicide is already part of your program, tank-mix it with Fortalis® to increase plant health, retain more pods, and win at the bin with an ROI of 2.9:1.
